

Biology. Kids. Hands-on. Fun.

Citizen Science Program

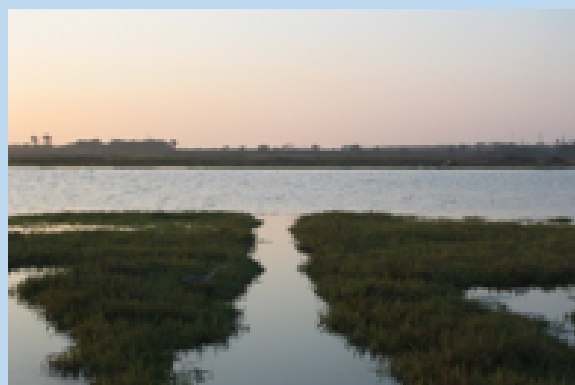

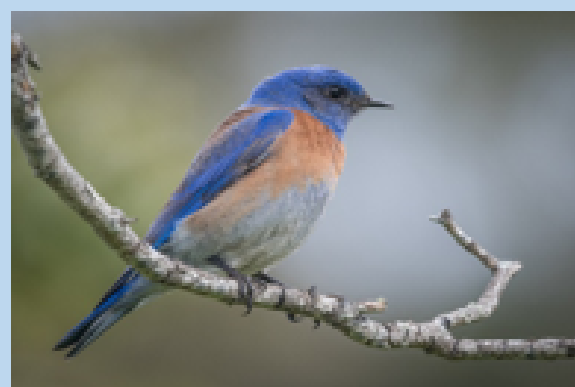

An Immersive Program for Wildlife and Ecology Enthusiasts in Grades 4-8!

We are excited to announce a unique and new course for Bionerds! This adventure will take you all across Orange County to learn about bird behavior, aquatic ecology, and conduct field research. In addition, it will teach your little scientists the health of the bird populations that live across Orange County from January to June, 2019.

What is Citizen Science?

Citizen science is a collaboration between professional scientists and the general public. Our goal is to engage your scientists with data collection and analysis of bird activity in Orange County, teaching them how to contribute to the world of conversation science. This will be done by collecting data from our different field sites and learning about how human activity impacts their environment. This program is collaborated with the Cornell Lab of Ornithology.

This course includes 6 field trips to different birdwatching sites, and 6 lectures that will teach your child how to analyze data and the different factors that affect their habitat.

Days: Selected Mondays (Lectures) and Saturdays (Field Trips)

Time: 5:00 – 6:00 pm

Location: TBA

Price: \$150 per child

Registration Deadline: December 31, 2018

More details to come! Please email us at outreach@bionerdsllc.com to join our interest list and receive further updates on registration.

Space is limited to 20 children! Register fast!
