TURTLE ROCK NATURE CENTER FIELD TRIP

About the Event

The Turtle Rock Nature Center is a five-acre preserve that is both a home for wildlife and an outdoor classroom where visitors can learn to protect our natural environment. Winding through the nature preserve is a paved trail that displays native Southern Californian habitats including: riparian, desert, and woodlands. Frequent visitors to our nature preserve trail include local birds who enjoy swimming in our pond, lizards who bask in the sun on rocks, and rabbits who disappear into the desert brush.

**1 Parent Attendee per Family,*

What is Bionerds?

Founded in Orange County, CA., September 2015, Bionerds's mission is to nurture curiosity, share lifetime passion and give opportunities for the younger generation to learn about biology through self-discovery. With the right environment, kids can learn and appreciate how amazing living things are.
